ABOUT ME

Project Manager with a technical edge. Background in full-stack development and data analytics gives me a practical understanding of how things are built and how data drives decisions — making me a stronger communicator, planner, and problem-solver.

WORK EXPERIENCE

Sandrologic Group Chisinau, Moldova

Website https://sandrologic.md/

Project Manager

05/01/2026 – Current

LF Energy Solutions Integration

- Coordinated sprint planning and task tracking for OperatorFabric module customization across a cross-functional team
- Acted as bridge between developers and energy utility stakeholders, translating technical constraints into actionable requirements
- Maintained integration documentation and tracked API delivery milestones against project timelines

Energy Sector Hosting

- Supported SLA monitoring processes and escalated infrastructure incidents to senior stakeholders per defined protocols
- Assisted in preparing ISO compliance documentation and coordinating internal audit readiness activities
- Tracked deployment schedules and coordinated between DevOps and client teams to minimize service disruption windows

VPP Sandbox Initiative

- Assisted in coordinating stakeholder meetings with ANRE representatives,
- Tracked delivery progress across VPP component teams (solar, wind, BESS, CHP), flagging risks and blockers to the lead architect
- Maintained project backlog and sprint boards, supporting Go services team in aligning technical tasks with sandbox requirements

Nowtec Solutions M Chisinau, Moldova

Software engineer

08/02/2024 – 27/02/2026

Took ownership of a internal tooling and infrastructure program, coordinating across team to deliver reliable systems that supported business growth and client onboarding at scale.

- Led feature development and a full platform migration of the company CRM (Next.js 13 → Next.js 16), managing scope, priorities, and delivery timeline across the team.
- Oversaw the architecture and delivery of a background task and queue processing system with rabbitMQ, enabling asynchronous workflows critical to business operations.
- Managed CI/CD pipelines and infrastructure-as-code practices (Terraform, GitHub Actions), ensuring consistent and reliable deployments across all environments.
- Designed and maintained workflow automation (N8N) to reduce manual intervention in core business processes, improving operational efficiency across teams.
- Owned the end-to-end delivery of a client instance provisioning system, enabling automated onboarding and configuration for new clients.
- Led a full cloud infrastructure migration from AWS to Infomaniak, coordinating technical execution and ensuring zero disruption to live operations.

Smart Energy Solutions Chisinau, Moldova

Data scientist

01/05/2023 – 01/02/2024

A set of modular automation solutions designed to improve operational efficiency across the organization:

Key Components:

- Email Parser - Python-based parser leveraging GPT-4 to automate processing of high-volume daily emails, significantly reducing manual triage time. Source available on GitHub.
- Data Management Platform - Full-stack web application built with React (frontend) and Node.js (backend), written in TypeScript, designed to store manage, and analyze all parsed data.
- Telegram Bot Suite - Three Python-based Telegram bots serving as internal productivity tools, enabling employees to submit product requests with automated manager notifications.
- N8N Integration - Workflow automation layer integrated into operational processes, including auto-generation of certificates for international expositions, reducing time spent on routine tasks.
- GPT-4 Rollout - Organization-wide integration of GPT-4, including staff training on prompt engineering to maximize efficiency and response quality.

Tech Stack: Python, React, Node.js (TypeScript), PostgreSQL, Telegram Bot API, n8n, OpenAI GPT-4 API

EDUCATION AND TRAINING

01/09/2022 – 31/08/2025 Chișinău, Moldova

Higher Education - Computer science Universitatea Tehnica a Moldovei

Address Strada Studenților 7, 2048, Chișinău, Moldova | **Website** https://utm.md/ru/

01/09/2009 – 31/05/2022 Chișinău, Moldova

Secondary School Liceul Nicolae Milescu Spătaru

Address Florilor 14/3, MD-2000, Chișinău, Moldova | **Website** http://nmspataru.com/ru/

LANGUAGE SKILLS

MOTHER TONGUE(S): Russian

Other language(s):

Romanian

Listening B2
Spoken production B1
Reading B2
Spoken interaction B1
Writing B1

English

Listening B2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

SKILLS

PROGRAMMING

GIT | Docker/Docker-compose | Python programming | LowCode | AI

FRONTEND

HTML / CSS / JavaScript | React TypeScript | NextJS | Tailwind CSS

BACKEND

Javascript(Nodejs, ExpressJs) | Linux (Server)

DATABASES

SQL/(MySQL) | Postgres RDBMS

PROJECT MANAGEMENT

problem finding, problem shaping, problem solving | Agile project management | communication

HOBBIES AND INTERESTS

Sport,gaming,hardware

I have a strong passion for hardware.From writing on Arduino scripts to automate everyday tasks, to building and configuring home server on Linux using my old pc. I enjoy the hands-on, problem-solving nature of working close to the metal.
Outside of tech, I stay active through regular jogging and playing football with friend.In my downtime, I enjoy playing pool and video games.

CREATIVE WORKS

24/11/2023 – 26/11/2023

Hackaton Winner

Hackaton on theme Humman traficking and machine learning

1. I led a team of freshmen who had no experience in machine learning.
2. We created a machine that could predict whether there would be family violence or not (using Python).
3. We developed a web platform that displayed all necessary information and some additional features according to the task.
4. Our machine could predict with 78% accuracy on our dataset and random cases.
5. Our presentation was the best among all participants (who were 3-4 years into their programs).
6. Our machine outperformed all participants, securing us the first place.
